

Albert Einstein

My character is Albert Einstein.

He is famous for making the math formula $M=mc^2$. The sad thing about him is he is now in heaven. He died of age in his sleep. When he died he was 76 years old.

Albert is short and stubby and always wears glasses. He is very wrinkly and has a mustache. He also has long gray hair. He is very fond of younger children and wants them to learn and become smart and successful so they can get a good job and become successful.

Einstein comes from Austria and same with the rest of his family. In his family he has 3 brothers and 4 sisters. They are all smart like Albert.

Albert Einstein is afraid of really dumb and stupid people because some times they tease him because they are dumb and he is smart.

His voice goes all deep when he gets angry and really sad. Normally he has a soft and smart voice witch is good to little babies! He weighs 67.9 Kgs.

What he also hates all dumb and silly people because they aren't very smart and don't have a very good job. What makes him sad is dumb and stupid people. Right now my character is wants to achieve mainly everything he can.

He can do that easily because he is in heaven!!At the moment he is having a good time. Next he will be having a better time!

Jackson.
